

SHAHZAIB NASEEM

AI Engineer | Machine Learning Engineer | LLM & Generative AI Developer

shahzaibnaseem3169@gmail.com | 0313-4750548 | Lahore, Pakistan | [linkedin.com/in/shahzaib-naseem](https://www.linkedin.com/in/shahzaib-naseem) | github.com/shahzaib427 | ai-portfolio-topaz-xi.vercel.app

PROFESSIONAL SUMMARY

Final-year CS student (AI Specialization) with hands-on experience building and deploying end-to-end AI/ML systems, LLM-powered applications, and AI automation pipelines. Proficient in deep learning, NLP, Retrieval-Augmented Generation (RAG), and n8n-based AI workflows. Skilled at integrating Python models with full-stack MERN applications via REST APIs. Passionate about Generative AI, LLM engineering, and intelligent automation.

TECHNICAL SKILLS

AI / ML / DL: Python, TensorFlow, PyTorch, Keras, Scikit-learn, XGBoost, LSTM, BiLSTM, Attention Mechanism

Generative AI & LLMs: LangChain, RAG, HuggingFace Transformers, OpenAI API, Prompt Engineering, FAISS

NLP & AI Automation: Tokenization, Lemmatization, Intent Classification, n8n Workflows, AI Agents

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, GridSearchCV

Web & Deployment: FastAPI, Flask, React.js, Node.js, Express.js, MongoDB, JWT Auth, SQL

Tools: Git, GitHub, Docker, Jupyter Notebook, VS Code, Postman, Vector Databases

PROJECTS

AI Personal Assistant & Customer Support Agent | n8n · LangChain · OpenAI API · Python 2024–2025

- Designed and deployed an AI-powered personal assistant using n8n automation workflows, integrating LLM-based reasoning with multi-step task execution across external APIs and services.
- Built a customer support agent with intent routing, context memory, and automated response pipelines — reducing manual handling by ~70% across simulated support scenarios.
- Integrated OpenAI API and LangChain for dynamic prompt management, achieving reliable multi-turn conversation flows with real-time tool use.

RAG-Powered HR Assistant Chatbot & ATS Resume Reader | LangChain · RAG · HuggingFace · FastAPI · FAISS 2024–2025

- Developed an HR assistant chatbot using Retrieval-Augmented Generation (RAG) to answer HR policy queries by retrieving relevant context from FAISS vector database embeddings.
- Built an ATS Resume Reader that parses candidate resumes, extracts structured data using NLP, and scores alignment against job descriptions — automating a previously manual screening workflow.
- Deployed both systems via FastAPI with React.js frontend; used HuggingFace embeddings for semantic search and LLM-generated responses with source attribution.

AI-Powered NLP Chatbot | Python · TensorFlow/Keras · Node.js · Express.js · React.js · MongoDB 2024

- Built an intent-recognition chatbot classifying 30+ user intents using a custom NLP pipeline (tokenization, stopwords removal, lemmatization) with TensorFlow/Keras.
- Secured backend with JWT authentication via Node.js/Express.js REST API integrated with React.js frontend, fully automating query handling across all intent categories.

EDUCATION

B.Sc. Computer Science — AI Specialization

Sep 2022 – Oct 2026

University of Education, Lahore · **Relevant Coursework:** Machine Learning · Deep Learning · NLP · Data Structures & Algorithms · Database Systems
