

Shahzaib Naseem

Full-Stack MERN Developer | Generative AI & LLM Engineer | AI/ML Specialist | Open to Remote

shahzaibnaseem3169@gmail.com | +92 313 4750548 | [linkedin.com/in/shahzaib-naseem](https://www.linkedin.com/in/shahzaib-naseem) | github.com/shahzaib427 | aiportfolio-topaz-xi.vercel.app

PROFESSIONAL SUMMARY

Motivated Computer Science graduate (AI Specialization) and full-stack developer with proven, hands-on experience delivering production-grade MERN web applications and end-to-end AI/ML and LLM-powered systems. Deep expertise in React.js, Node.js, MongoDB, and RESTful API architecture, complemented by applied proficiency in NLP, Retrieval-Augmented Generation (RAG), and agentic AI automation pipelines built with LangChain, OpenAI API, HuggingFace Transformers, and n8n. Track record of architecting intelligent full-stack products — from RAG-driven HR systems and autonomous AI agents to conversational coaching tools — that reduce manual effort, improve decision-making, and deliver measurable business value.

CORE SKILLS & TECHNOLOGIES

AI / Gen AI:	LangChain, RAG, HuggingFace Transformers, OpenAI API, FAISS Vector Search, Prompt Engineering, n8n Agentic Automation, LLM Fine-Tuning, Semantic Search
ML / Deep Learning:	Python, TensorFlow, PyTorch, Keras, Scikit-learn, NLP, Text Classification, Embedding Models, Named Entity Recognition, Jupyter Notebook
Frontend:	React.js, Next.js, Redux Toolkit, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive & Adaptive UI
Backend & APIs:	Node.js, Express.js, FastAPI, Flask, RESTful API Design, JWT Authentication, MVC Architecture, Microservices
Databases:	MongoDB, Mongoose ODM, MongoDB Atlas, Aggregation Pipelines, FAISS Vector DB, SQL
DevOps & Tools:	Git, GitHub, Docker, Postman, n8n Workflows, Vercel, Linux CLI, C++

PROJECT EXPERIENCE

AI-Powered HR Management System — Final Year Project

2025 – 2026

LangChain · RAG · HuggingFace · FAISS · FastAPI · React.js · Node.js · MongoDB · PyTorch

Engineered a comprehensive, AI-native HRM platform covering the full employee lifecycle — from recruitment through payroll — with six embedded AI modules deployed as FastAPI microservices and surfaced through a React.js + Node.js full-stack interface.

- **AI Attendance & Anomaly Tracking:** Built computer-vision-driven attendance recognition with automated anomaly detection, eliminating manual punch-in processes and reducing attendance discrepancies by an estimated 90%.
- **ATS Resume Screening Engine:** Developed an NLP pipeline using HuggingFace embeddings and FAISS vector search to parse resumes, extract structured competency data, and score candidate-JD alignment — automating 3–4 hours of manual HR effort per hiring cycle.
- **RAG-Based HR Chatbot:** Deployed a conversational HR assistant powered by RAG; retrieves policy context from FAISS and generates source-attributed LLM responses, cutting HR query resolution time from hours to seconds.
- **Employee, Leave & Payroll Management:** Designed RBAC dashboards for profile management, leave approval workflows, and automated payroll computation — reducing monthly payroll processing time by ~60%.
- **Performance Tracking:** Built KPI-tracking modules with visual analytics dashboards, cutting quarterly review preparation time by 40% through data-informed reporting.

AI Personal Assistant & Autonomous Support Agent

2025 – 2026

n8n · LangChain · OpenAI API · Python · FastAPI · REST Integrations

- Architected a multi-step AI personal assistant using n8n automation workflows with LLM-based reasoning and dynamic task orchestration across Gmail, calendar, and third-party APIs — enabling zero-touch execution of complex multi-stage workflows.
- Engineered a customer support agent with intent classification, persistent context memory, and automated response pipelines; reduced simulated manual handling by ~70% while maintaining coherence across multi-turn conversations.
- Implemented tool-calling and function-chaining patterns for real-time data retrieval and downstream action triggering — demonstrating production-ready agentic AI architecture.

AI Wellness & Productivity Coach

2025 – 2026

React.js · Node.js · MongoDB · LangChain · OpenAI API · Tailwind CSS

- Developed a personalised wellness web application backed by an LLM coaching layer that adapts daily goal recommendations based on user mood, habit patterns, and progress — increasing simulated engagement by ~45% versus static goal-tracking tools.
- Built a context-aware recommendation engine cross-referencing user history with wellness research embeddings to surface evidence-backed productivity interventions.

AI Interview Coach

2025 – 2026

React.js · FastAPI · OpenAI API · LangChain · Speech-to-Text

- Built a role-adaptive interview platform that auto-generates domain-specific questions, evaluates responses in real time using LLM scoring, and delivers structured feedback on clarity, technical depth, and communication quality.
- Integrated speech-to-text input, dynamic difficulty scaling, and a JD keyword-alignment layer to simulate realistic interviews and ensure targeted, ATS-aware preparation.

Intelligent PDF Reader — RAG Document Q&A

2025 – 2026

Python · LangChain · FAISS · HuggingFace · OpenAI API · React.js · FastAPI

- Engineered a document intelligence platform where users upload PDFs and query them in natural language via a RAG pipeline combining FAISS semantic search with OpenAI generation, achieving >90% answer relevance across technical, research, and policy documents.
- Built a React.js interface with real-time streaming responses and page-level source attribution cards, delivering verifiable, context-grounded answers.

EDUCATION

B.Sc. Computer Science — AI Specialization

Sep 2022 – July 2026 (Expected)

University of Education, Lahore, Pakistan

Relevant Coursework: Machine Learning · Deep Learning · NLP · Data Structures & Algorithms · Database Systems · Computer Vision · Software Engineering

CERTIFICATIONS

Full Stack Developer Certificate — MERN Stack — MongoDB, Express.js, React.js, Node.js

2024

React.js Certification — Component architecture, state management, hooks & scalable UI

2024

Front-End Developer Certificate — HTML5, CSS3, JavaScript ES6+, Responsive Design & UI/UX

2023

ADDITIONAL INFORMATION

Languages: English (Professional) · Urdu (Native) · Punjabi (Native)

Interests: Generative AI Research · Open-Source Contribution · LLM Engineering · AI Automation
